TOKEN OVERVIEW

Network	TON
Token	MINON / \$MTON
DEX	STON.fi pair is live
Supply control	Minting is disabled
Treasury	Locked allocation has a public TonRaffles proof
Contract source	TON Verifier and GitHub links are public

Transparency links help people verify facts. They do not remove market risk and they are not a promise of price performance.

02 / ROADMAP

BUILD THE ARMY.

MINON follows visible community milestones. The roadmap is directional, not a guarantee. Each phase should be supported by real holders, public updates and transparent execution.

PHASE 01 / DONE**DEX LAUNCH**

STON.fi pair live. Mint disabled. Treasury lock and source links published.

PHASE 02 / NOW**100 REAL HOLDERS**

Daily content, public progress updates and a recognizable MINON core community.

PHASE 03 / NEXT**500 HOLDERS**

Wider holder distribution, stronger liquidity and more TON ecosystem visibility.

PHASE 04 / TARGET**ROAD TO \$50K**

Organic milestones, relevant listing requests and new community drops.

OPERATING PRINCIPLES**REAL COMMUNITY**

Focus on genuine holders and repeat participation.

TRANSPARENT UPDATES

Share milestones, lock proof and contract links consistently.

MEASURED GROWTH

Track liquidity depth and holder distribution, not only price.

ORIGINAL IDENTITY

Build recognizable MINON visuals, stickers and rituals.

03 / OFFICIAL RESOURCES

VERIFY BEFORE YOU SWAP.

Use the official links below. Before every transaction, compare the full contract address rather than relying on a token name or ticker.
